

SPINE DEVICE

ADDITIVE MANUFACTURING

Contract metal 3D printing

From prototype to production, our ISO 13485–certified solutions help solve complex manufacturing problems.

Post-processing & powder removal

Our experience in producing medical devices enables us to work with complex geometries from design to finished part.

Serial production

Our validated DMLS printers and processes provide you confidence in our ability to create medical grade devices.

Inventory management

Your devices, right when you need them. We can tailor an inventory management system to meet your product demand needs.

Validated

We use a completely validated manufacturing process, to deliver you anything from prototype to serial production parts.

On time

We are proud of the fact that we have delivered 100% of our serial production spine orders ahead of schedule.

LEAVE ALL YOUR MANUFACTURING CHALLENGES TO US

We understand the importance of designing a manufacturing plan built around quality in order to reduce your timeline and costs when releasing product to the market. Our engineers will help you to take full advantage of the benefits of medical metal AM.
